HIRE A SALESFORCE DEVELOPER TECH SPECIALIST
SCALE YOUR DELIVERY TEAMS WITH THE BEST TALENT

How do we get the right Tech Specialists for you?

Recruit
Salesforce specialise in sourcing, recruiting, developing and certifying high potential early career consultants for the Cloud, DevOps and Software Development and RPA.
Train
Our Tech specialists are project ready. They're trained and certified in Salesforce technology before joining you. We continually invest in their career skills.

Deploy
Once skilled in technology and modern ways of working, we deploy project ready Tech specialists into our customers to accelerate delivery of critical high value projects.

Transfer
As a cost and time effective complement to traditional recruiting methods and the freelance market, we offer clients the flexibility for Tech Specialists to convert the client's permanent staff.

BENEFITS OF OUR MODEL

Remove hiring headaches

Hiring people is complex so we take care of it - we'll find the perfect match for you. We'll look at what you need to deliver and find someone with the right personality, skills and knowledge to do it.

Reduce hiring costs

You'll carry no employment liabilities and associated costs (unless our Tech specialist becomes your permanent employee). And, if you're working with one of our teams, you'll reduce management costs.
Technical know-how

Finding someone with the right skills – especially in emerging technologies – is not usually an easy task. Our Tech specialists are trained and certified – ready to jump onto your project right away.

A bigger team - fast

We all know new challenges can come at any time – no matter how much is already going on. We'll bring in the trusted extra hands you need, as soon as they're needed.

On your doorstep

It's hard finding the right person in the right location. Our Tech specialists come to you – wherever you are in the UK. Location won't hold you back.
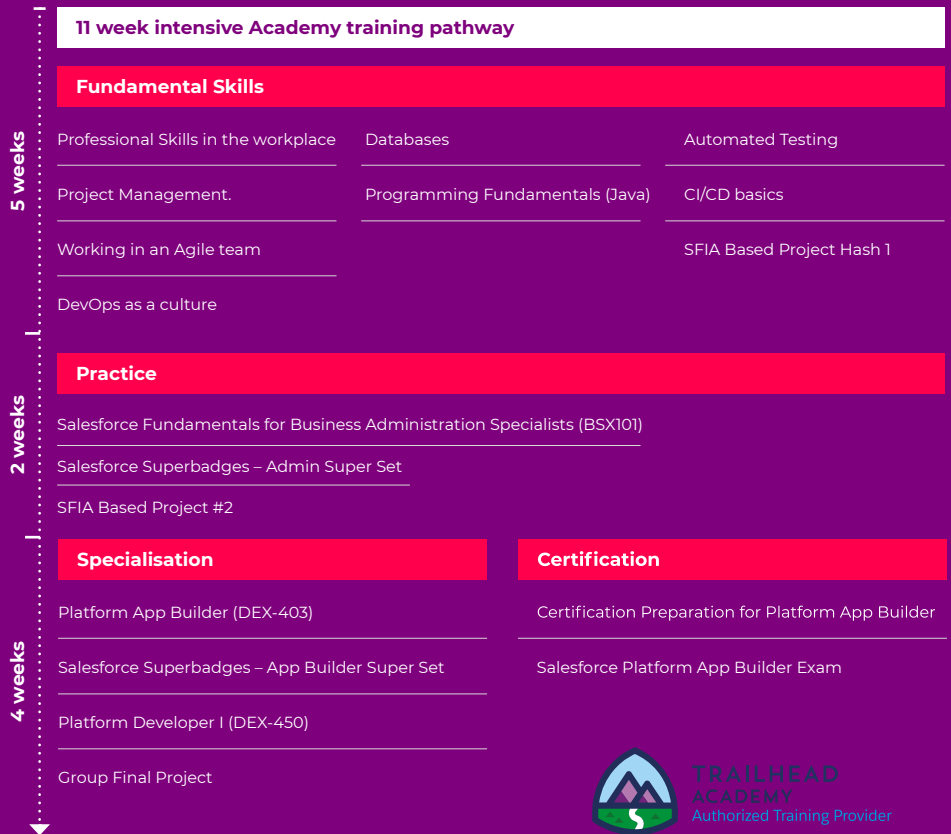

Hold on to knowledge

It's an appealing (and more reliable) alternative to freelancers or contractors. You'll hold on to skilled people as well as their knowledge and experience – critical to delivering your technology programmes.

WHAT TRAINING DO OUR TECH SPECIALISTS HAVE?

Our training programmes begin with an 11 week pathway in our BCS accredited academy.

Once deployed we support our tech specialists with a pathway of ongoing personal development, including QA's Cloud Academy and Salesforce Trailhead.

11 week intensive Academy training pathway

5 weeks
